I am a Southern California Native being born and Raised in Redlands. I have always loved Utah and decided to live here after I finished Automotive school. I have been an automotive technician for Mercedes Benz for 3 years and have decided it is time to move on in my career.

My journey with Web Development is one of passion and determination. As a child watching Tron and other tech centered films I was amazed by what was possible. I knew at that time that I wanted to learn the skills to do anything with a computer.

In my free time I enjoy hiking, mountain biking, gaming, and managing my personal financial portfolio.

"Only those that can see the invisible, can do the impossible"

Work History

2017-05 - Current

Automotive Technician

Mercedes-Benz Of Draper, Draper, UT

- Maintained fleet vehicles in good working order by following preventive and corrective maintenance schedules according to OEM.
- Inspected damaged vehicles to estimate repair labor cost and required parts expense.
- Broke down complex mechanical information into simpler parts for individuals with little or no understanding of system operations.
- Worked on Mercedes-Benz vehicles to repair engines, transmissions and electrical systems.
- Repaired brake, exhaust, electrical and other systems for all automotive brands.

2012-11 - 2014-11

Volunteer Missionary

The Church Of Jesus Christ Of Latter-Day Saints, Vancouver, Canada

- Volunteer representative of the church engaged variously in proselytizing, church service, humanitarian aid, and community service.
- De-escalated and resolved conflicts between local peoples and missionary representatives.
- Trained 2 new missionaries on effectively sharing religious beliefs in local community.

2011-08 -
